PROFILE INFO

As a front-end developer, I am passionate about creating user interfaces that are not only visually stunning but also intuitive and easy to use. My skills in HTML, CSS, JavaScript and React combined with my strong work ethic and ability to collaborate effectively with cross-functional teams, make me an ideal candidate for your organization.

PROJECTS

Netflix - Clone

Netflix clone landing page created entirely with HTML and CSS, offering a design experience similar to the original platform.

Musica - Music Website

A music streaming web app with frontend design inspired by Spotify, developed using HTML, CSS, and JavaScript, providing users with a similar experience to the original platform for playing music and exploring playlists.

Travelby - Travel Web App

This React-based demo web app is a travel booking platform, inspired by MakeMyTrip, that allows users to search and book hotels, flights, and other related travel services.

Woodify - E-Commerce Furniture Website

This website is an e-commerce platform that showcases the selling of furniture and similar items, and it was created using HTML, CSS, and JavaScript.
